[github.com/monkey-mode](https://github.com/monkey-mode) • [linkedin.com/in/suphachai-pechtumrong](https://linkedin.com/in/suphachai-pechtumrong) • [credly/suphachai-pechtumrong](https://credly/suphachai-pechtumrong)

Senior Associate Backend Developer specializing in Golang and distributed systems. Experienced in building high-scale financial platforms and real-time data pipelines. Certified GCP Professional DevOps Engineer and AWS Solutions Architect with a focus on observability, performance optimization, and scalable cloud architecture

## Experience

- Arise By Infinitas** Bangkok, Thailand (hybrid)  
**Senior Associate Backend Developer ( Full-time )** Jan 2025 – Present
  - Architecting and delivering **high-scale backend solutions** for financial platforms using Go.
  - Leading **load testing and performance tuning** for microservices, improving reliability and peak-load stability.
  - Designing detailed **low-level system architectures** and sequence diagrams to ensure service scalability.
  - Managing **production incident response**, root cause analysis, and implementing long-term mitigations.
  - Optimizing **cloud costs** by tuning GCP resource allocation based on detailed usage patterns and load test data.
  - Contributed to **T0 (real-time settlement) mutual fund service**, processing **฿12Billion (THB) in transaction value** within the first 3 months.
- Associate Backend Developer ( Full-time )** Mar 2023 – Dec 2024
  - Developed **event-driven microservices** using Golang, Gin, and **Kafka** for asynchronous data processing.
  - Improved batch processing performance by **30–60%** through optimization and testing with **JMeter and k6**.
  - Maintained core backend services supporting the **MFOA platform**, ensuring high availability and code quality.
- DKATALIS** Singapore (remote)  
**Software Engineer ( Contract )** Jan 2022 – Dec 2022
  - Contributed to the **Customer Domain** for the Jago App, supporting high-traffic onboarding and KYC workflows.
  - Maintained **TypeScript backend services** and assisted in the strategic migration to **Java Spring Boot**.
  - Developed cross-platform mobile applications using **Flutter**
- Toyota Motor Corporation** Bangkok, Thailand (remote)  
**Software Engineer ( Contract )** Nov 2021 – Jan 2022
  - Built a **Proof of Concept (PoC)** healthcare ride-dispatch service utilizing serverless architecture.
  - Implemented **Next.js frontends** and **Node.js backends** on AWS using S3, CloudFront, and Serverless Framework.
  - Designed and validated **RESTful APIs** through real-world pilot usage.

## Certifications & Projects

- Amazon Web Services**
  - [Certified Solutions Architect – Associate](#): cloud architecture, security, scalability Valid Dec 2025 - Dec 2028
- Google Cloud**
  - [Professional DevOps Engineer Certification](#): CI/CD, SRE, reliability engineering Valid Aug 2024 - Aug 2026
- Arise By Infinitas**
  - [GitHub](#), [Website](#): Built an internal QA web utility using Next.js and Rust (WASM) to provide hashing, encryption, and decryption features, reducing backend support workload and improving testing efficiency.

## Skills & Interests

**Programming Languages:** Go (Primary), TypeScript, Java, Python, Rust (High-performance interest).  
**Databases:** PostgreSQL, MySQL, MongoDB, Redis, Memcached.  
**Cloud & Infrastructure:** GCP, AWS, Kubernetes (K8s), Terraform, Docker.  
**DevOps & Observability:** CI/CD, GitOps (ArgoCD), Jenkins, Helm, **Prometheus/Grafana**.  
**Frameworks & Tools:** Gin, Spring Boot, Kafka, Node.js, JMeter, k6, HashiCorp Vault.  
**Language:** Thai (Native), English (C1)  
**Interests:** Exploring Rust for high-performance systems and blockchain for decentralized applications.

## Education

- Suranaree University of Technology** Nakhon Ratchasima, Thailand  
Bachelor of Engineering - Computer Engineering, GPA 3.80. Graduated with first-class honors Dec 2022
  - Graduation Project: Certsvce Educational Certificate Verification Service on a blockchain-based system
  - Honors & Activities: Scholarships for Outstanding Students, Winner of Hackathon Smart Government
